

USING FOOD FOR FECES

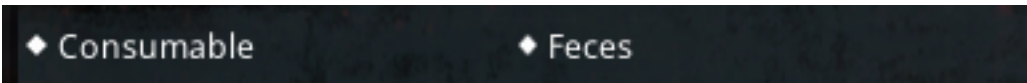

Not all foods have this feature; it is a work in progress.

Inventory User Interface

1. Item Search
2. Sort Order
3. Item Category Filters
4. Item Modifiers

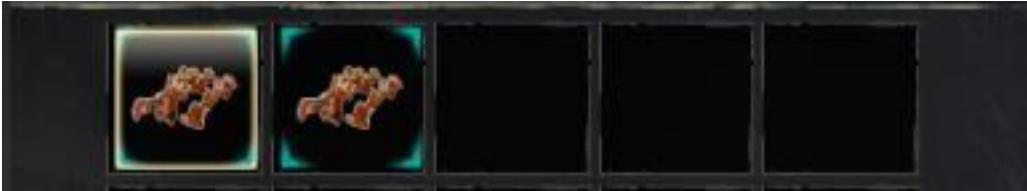

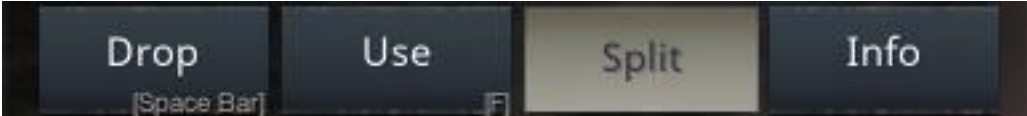

Food stuffs that produce feces will be labeled in the Modifier's panel(4).

Food stuffs meant for decoration will be labeled so.

Food stuffs that are used for Feces **must be split**

After Splitting, your Foods **Durability bar** will still be displayed.

Foods that produce Feces, **if not split, will not work** and should be **dropped**. **DO NOT** drag it back to the stack. The durability bar will no longer be displayed when this happens.

After splitting simply use the food stuff and you will be full of Feces.

Visit a *Chamber Pot* to drop off the load.
